

PLAYA EXPANDS AND IMPROVES ON-SITE COMPLIMENTARY COVID-19 TESTING FOR ALL DOMINICAN REPUBLIC RESORTS

Effective January 26, 2021, the Centers for Disease Control and Prevention (CDC) has expanded requirements for a negative COVID-19 test result to all air-travel passengers entering the United States. This requirement is the latest addition to a growing list of countries requiring COVID-19 testing prior to entry or reentry.

As a result, Playa has expanded the recently announced complimentary on-property COVID-19 antigen testing to include on-property polymerase chain reaction (PCR) testing for guests traveling to countries that require it for entry. In addition, while there is a 7-night minimum stay requirement for complimentary PCR tests, the minimum stay requirements for complimentary antigen testing have been removed. For guests staying less than seven nights and needing PCR testing, a discounted rate of \$79 per test is available.

As a reminder, complimentary on-site antigen tests are available to registered guests at our resorts in Jamaica and Mexico, based on three-night minimum stay, along with discounted PCR testing. For the most updated information, please refer to the COVID-19 Updates section of our website at www.playaresorts.com/covid-19-updates.

PLAYA'S DOMINICAN REPUBLIC RESORTS

Hyatt Ziva & Zilara Cap Cana

Sanctuary Cap Cana

Hilton La Romana
